

# Individual reflection

Christian Nilsson 2019-10-07

This week I have continued to work on both the mock data files that is meant to simulate the Stena Line api that we don't have access to and to parse those files to the objects we are using in our design.

I had some problems testing my work after I merged it with the rest of the groups code but I hope that it will be solved next week so I can finish the task.
