

Individual Reflection

Jonathan Örgård

15/19 2019

My goal in this course is to learn about Scrum. While summer working at Volvo Cars I have only seen other people do Scrum, so it will be nice to learn how Scrum is done to actually understand why they went on Scrum meetings all the time. It will also be fun to learn more about Android development since that's something completely new to me.

This week I attended all the team meetings and helped with designing the GUI and started investigating what tools we need to complete our project.

I hope to be able to help the team by helping other team members overcome blockers they might encounter while working on tickets. I have also encountered APIs before so I hope to be able to help with that.
